

THE JOURNEY OF A THOUSAND MILES BEGINS WITH A SINGLE STEP

Infected with a rare strain of meningitis, Hugo spent 47 days in the hospital, 32 of them in a coma. Waking up on Christmas Eve, doctors realized that he was paralyzed on his left side and predicted he would not be able to walk again. At the end of June, 2010, Hugo took his first independent step and now walks without aids.

A CHILD'S FAITH

Denise's life is filled with the physical challenges of multiple diseases and as a baby, she was diagnosed with hip dysplasia. She began therapy with us just after her first birthday. Last year she faced the possibility of surgery to stabilize her hip. Determined to do everything for "their" little girl, our therapists devised a creative therapy program and redoubled their efforts to strengthen the joint. Denise avoided that surgery.

AQUATIC THERAPY GOT ME WALKING AGAIN

Following a twelve hour plane ride, Stephen Gill's back gave out. Doctors diagnosed a severely herniated disc and a tear in the wall of the disc resulting in serious compression to both the spinal cord and the nerve root. They recommended surgery but Stephen resisted and chose a more conservative approach, Aquatic Therapy. Now Stephen is able to run again.

A SOLDIER'S BATTLE

Michelle, a soldier in Intelligence, was diagnosed with a brain tumor located in the left-center of her brain, the part that controls her motor skills. After surgery she came to MD Anderson for chemotherapy. She chose our clinic to help her with her vertigo a side effect of her treatments which fluctuated with the chemotherapy. Not long after starting with us, Michelle put aside her walker.

THEY GAVE ME MY LIFE BACK... THEY ARE AMAZING

Carol was playing with her grandson when she shattered her hip. Luckily she avoided surgery but the road ahead to heal her hip and reclaim her life was arduous. A dynamic therapy plan was created for her starting with aquatic therapy. Slowly she regained full function of her hip and is now able to climb steps, plant her garden and even wear heels again.

WORK HARD, PLAY HARD

Due to a horrific accident, thirteen year old Evan's foot was frozen in place and the bones had not yet healed when he came to our clinic. For five months Evan and our therapists worked in concert with his doctors to regain his ability to walk. Eight weeks after being given the green light to walk again, Evan qualified for the summer swim team's state competition.
